

Do you need a Data Catalog?

4-steps to unlock collaboration, literacy, and institutional knowledge

Siloed Data Challenges

 Does your team have difficulty finding and understanding data across systems?

 Are you struggling with the inefficiencies of manual data governance processes?

WHAT YOU NEED:

 Intelligent search and discovery capabilities.

 Seamless integration with your tech stack, including Snowflake, dbt, and PowerBI for efficient data discovery and governance.

Data Trust & Lineage Clarity

 Do you lack trust in your data due to unclear data provenance & untraceable lineage?

 Do you struggle to demonstrate compliance with regulations like GDPR?

WHAT YOU NEED:

 Automated end-to-end table and column level lineage.

 Integration with MS Teams for capturing institutional knowledge.

Driving Adoption & Data Governance

 Do your teams struggle to collaborate b/c everybody has a different understanding of the same data?

 Do you find it challenging to track and fulfill information requests?

WHAT YOU NEED:

 Automated end-to-end table and column level lineage.

 Integration with MS Teams for capturing institutional knowledge.

Enhanced Collaboration & Knowledge Sharing

 Are you seeing inefficiencies in collaboration across technical and business teams?

 Do you worry about losing institutional knowledge?

WHAT YOU NEED:

 Automated end-to-end table and column level lineage.

 Integration with MS Teams for capturing institutional knowledge.

If a data catalog seems like the right solution for your team, check out Metaphor!

We've got you covered on all of the above, plus:

-  Unparalleled integration capabilities for modern data stacks
-  Agile and cost-effective solutions
-  Superior data discovery, governance, and trust enhancements
